

PEAK STAGE DIFFERENCES ALT7b

Percent of years with max stage at least
0.50 ft lower than RPA02
1965 - 1995 Simulation Period

Note: Map values do not distinguish between groundwater and surface water and should only be used as a general indicator of subregions that may have a change in peak stages. Those subregions require more detailed investigation and analysis before site-specific inferences about changes in flooding risk can be made.
