

# PEAK STAGE DIFFERENCES

## alt2b

Percent of years with max stage at least  
0.50 ft lower than alt2a

10 Apr 2006 1:40:58 Monday

Note: Map values do not distinguish between groundwater and surface water and should only be used as a general indicator of subregions that may have a change in peak stages. Those subregions require more detailed investigation and analysis before site-specific inferences about changes in flooding risk can be made.
