

LAKE OKEECHOBEE HYDROLOGIC PERFORMANCE MEASURES
1965-2000 Simulation Period

Number of times lake stage is above 17.5 ft for more than 7 days:

lors-fwo	2
albs2-A	0
alt2a-B	0
alt3-B	2
alt4-A	0

Number of days lake stage is below 12.56ft:

lors-fwo	3336
albs2-A	4809
alt2a-B	5141
alt3-B	3260
alt4-A	4841

Notes:

It is necessary to review the lake stage hydrograph to ensure that double counting has not taken place. For example, if the lake stage goes above 17.5 ft for a day and subsequently falls below 17.5 ft the next day, the number of events counted will be two; whereas, by looking at the lake stage hydrograph, one can make the determination that it should only be counted as a single event.

For Planning Purposes Only
