

PEAK STAGE DIFFERENCES

1b-T3

Percent of years with max stage at least
0.25 ft higher than 1b-T2

30 Nov 2006 20:08:14 Thursday

Note: Map values do not distinguish between groundwater and surface water and should only be used as a general indicator of subregions that may have a change in peak stages. Those subregions require more detailed investigation and analysis before site-specific inferences about changes in flooding risk can be made.
